

# BLUE1 COMBO AST SYSTEM

## DUAL COMPARTMENT DIESEL & DEF STORAGE

The Blue1Combo AST System is the industry's first and only Dual Compartment DEF / Diesel AST System that meets all NFPA, UL, NEC, ISO and STI industry standards. The primary diesel compartment is available in either UL-142, Flameshield or UL-2085, Fireguard models. The DEF compartment is insulated and lined with our proprietary, industry approved liner. Both diesel and DEF dispensers are mounted on a convenient low profile platform. This turn-key system is the perfect long-term solution for fleet owners in every vocation.

### ADVANTAGES AND BENEFITS INCLUDE:

- **MAXIMIZE FUEL AND FLUID SAVINGS.** Volume purchases will substantially reduce delivered cost per gallon for both products.
- **COST EFFECTIVE.** Minimize installation costs by installing one complete system versus two separate storage systems.
- **COMPACT.** One system for both products minimizes valuable real estate requirements.
- **ELIMINATE POTENTIAL RUNOUTS.** Larger storage capacity reduces the risk of run-outs from product shortages or delivery driver delays.
- **SAFE.** Double-wall with 110% secondary containment for both product compartments.
- **LEGAL.** Meets all industry standards for both diesel and DEF.
- **PRODUCTIVE.** Drivers can dispense both products simultaneously.

Storage combinations available from 10,000 to 30,000 gallons total.  
Available with your choice of Gasboy, Wayne or other private label dispensers.  
Compatible with all major card reader systems.
